MANJU THAKOR

Frontend Developer • React.js • Next.js • JavaScript

+91 9898343610 | thakor.manju.391@gmail.com | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Frontend Developer with 2.7 years building production-grade SaaS applications in React.js and Next.js. Delivered complex, data-heavy dashboards serving real-time marina operations, AI-driven marketing tools, and secure file-sharing platforms. Strong track record of integrating REST APIs, optimizing rendering performance, and shipping pixel-accurate UIs in cross-functional teams. Looking to bring component architecture expertise and a shipping mindset to a high-impact product team.

TECHNICAL SKILLS

Frontend	React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Vanilla JS, PSD to HTML
UI Libraries	Tailwind CSS, Bootstrap, Ant Design, jQuery
Tools & Platforms	Git, GitHub, VS Code, Chrome DevTools, Linux, Figma
Core Concepts	REST API Integration, Responsive Design, Performance Optimization, Cross-functional Collaboration

WORK EXPERIENCE

Frontend Developer — PySquad Informatics *Ahmedabad, Gujarat • Sep 2023 – Present (2 yr 7 mo)*

- Built and maintained 3 production SaaS platforms using React.js, Next.js, Tailwind CSS, and Ant Design — reducing cross-device UI defects by standardizing a shared component library used across all modules.
- Integrated 10+ REST APIs and applied performance optimization techniques, improving application load times and overall user experience.
- Optimized frontend rendering for large real-time datasets on operational dashboards; replaced naive re-renders with memoization and virtualized lists, achieving noticeably smoother UX at scale.
- Collaborated with backend engineers and designers from spec to production, consistently delivering features on or ahead of sprint deadlines across 3 cross-functional teams.
- Established component reusability conventions adopted team-wide, reducing duplicated UI code and accelerating feature development on new modules.

Frontend Developer Intern — Tops Technologies *Ahmedabad, Gujarat • Jan 2023 – Jun 2023 (6 mo)*

- Built and deployed multiple responsive web pages and mini-projects using HTML5, CSS3, JavaScript (ES6+), and React.js.
- Gained hands-on experience integrating front-end interfaces with REST APIs, strengthening understanding of frontend-backend communication.
- Accelerated debugging proficiency by resolving UI and logic issues through systematic use of browser developer tools.

PROJECTS

Marinapy – Marina Management SaaS Platform

React.js, Next.js, Ant Design, REST APIs, Tailwind CSS

- Architected a cloud-based marina management platform covering berth management, CRM, billing, and client communication for marina operators across multiple time zones.
- Built interactive map-based dashboards enabling real-time occupancy and asset monitoring — implemented SVG overlays and dynamic data layers on top of map APIs.
- Implemented self-service onboarding flows and mobile-ready UI components, improving accessibility and adoption for global users.
- Owned frontend performance for large dataset views: introduced pagination, lazy loading, and memoization patterns to keep dashboards responsive under high data volumes.

Texture – AI-Powered Digital Marketing SaaS

React.js, REST APIs, Django Templates

- Contributed to a SaaS platform combining REST API integration and Django templates to deliver AI-powered text analysis and advertising enhancement tools.
- Built dynamic UI components enabling marketers to seamlessly integrate API-driven workflows for automated ad optimization and content analysis.
- Designed a user-friendly, responsive interface that helps marketing teams extract actionable insights with minimal friction.
- Implemented scalable backend·frontend integration to ensure high performance, reliability, and smooth data flow across AI-driven marketing features

ShareLyze – Secure File-Sharing Platform

React.js, HTML, CSS, REST APIs

- Designed and developed a secure file-sharing platform supporting images and PDFs with full user authentication (registration, login, session management) and access controls.
- Built a real-time activity tracking dashboard capturing view counts, user interactions, and IP-level events — designed for both analytics and security monitoring.

EDUCATION

Bachelor of Computer Applications (BCA) CGPA: 7.67 / 10

Smt. B.K. Mehta (IT Centre) BCA College, Palanpur, Gujarat · 2018 · 2022

LANGUAGES

English, Hindi, Gujarati
